Tajikistan

Road Safety Profile

Population (2023) (1)

10.1 Million

Below 18 years old
42%

Above 60 years old
6%

GDP, PPP (2022) (2)

48.6 Billion USD

Lower middle income

Every 6 hours, someone dies in a road crash in Tajikistan (3)

Road crash fatalities (2019) (3)

1,461 deaths

Annual average growth rate

Road crash is the top 13th cause of death in Tajikistan (4)

Road crash fatality rates by different sources

WHO (2019) (3)

15.7 per 100,000 population

GBD (2019) (4)

7.5 per 100,000 population

Country official statistics ()

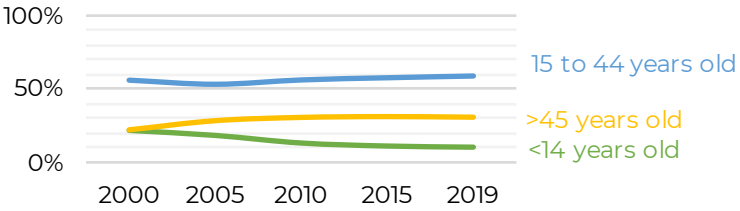
n.d.

Share of road crash fatalities by gender (3)

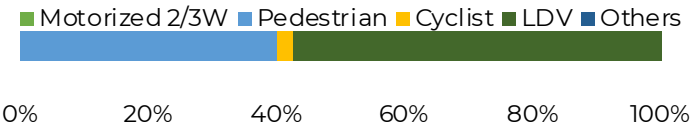
Male
80%

Female
20%

Share of road crash fatalities by age (4)



Share of road crash fatalities by mode (2016) (3)



Cost of road crash fatalities and serious injuries (2016) (5)

417 Million USD

As a share of GDP
6%

Health expenditure (6)
7%
(in comparison)

Road infrastructure availability (2023) (7)

4.4 kilometers per thousand population

Road infrastructure density (2023)

318 meters per sqkm

Motorways, share ()
n.d.

Paved road ratio (2018) (8)
70%

Share of road infrastructure with 3-star or better safety rating for each road user category (9)

Vehicle occupant
n.d.

Motorcyclist
n.d.

Pedestrian
n.d.

Bicyclist
n.d.

iRAP assessed road length
n.d.

Motorization rate, total vehicles (2023) (7)

n.d.

2-wheelers
n.d.

LDV
n.d.

Buses
n.d.
